

## Deliver Microsoft Enterprise Mobility Suite People-Centric IT Cloud Services for your Users

# Itergy

*"Your Cloud Solution Provider"*

Organizations are struggling to meet the challenges posed by the influx of consumer-oriented technology into the workplace. Today, users are expecting to access all of their work resources from any location on any device. These challenges are eroding the standards-based approach to IT.

Although allowing BYOD can seem like a simple request to users, delivering it is actually complicated and carries important risks and challenges. That is why choosing the right expert and solution is crucial for organizations if they want to enable consistent user access to corporate resources from any location or device while securely managing their devices and applications and protecting their company data.

### Our solution

Itergy offers a solution that can get you started down the road of mobile device management with the Microsoft Enterprise Mobility Suite. Our extensive knowledge and expertise around the different components of this solution are recognized worldwide. That is why Microsoft has selected Itergy as one of the top Canadian EMS partners.

Our "proof of concept" solution includes:

- Setup of Azure AD tenant trial
- AD synchronization with Azure AD
- Enablement of one partner application
- Demonstration of capabilities of Azure AD premium service
- Configuration and demonstration of Windows Intune capabilities
- Enablement of Microsoft Azure Rights Management on 3 computers with Microsoft Office 2013
- Demonstration of Rights Management capabilities

Prerequisites:

- Lab setup with a test Active Directory populated which has access to the Internet
- 3 supported mobile devices available for testing
- Set of 10 Microsoft Office documents available for testing
- Set of 3 computers with Microsoft 2013 available for testing

If you do not currently have a test lab on Azure, Itergy can help you set it up. Check out our Azure Test & Dev Offer.

### Top Features

- Manage your mobile devices in the cloud
- Readiness of Protect your data
- Provide hybrid identity and access management

### Why Itergy?

Because of our extensive experience in Active Directory and our proven record of helping companies with their BYOD needs, Itergy was chosen by Microsoft to be one of the top two Canadian EMS partners.

We can help set up your Azure environment, with a proof of concept in as little as 10 days for the entire process.

Once we've completed your proof of concept, Itergy will also be the go-to expert for your EMS deployment project.

Contact us today and find out how we can help you build great solutions!

## Microsoft's Enterprise Mobility Suite

The Enterprise Mobility Suite is the comprehensive cloud solution to address your consumerization of IT, BYOD, and SaaS challenges. The suite includes:

### HYBRID IDENTITY AND ACCESS MANAGEMENT

Azure Active Directory Premium delivers robust identity and access management from the cloud, in sync with your existing on-premises deployments.

### DEVICE MANAGEMENT

Windows Intune enables you to manage PCs and mobile devices from the cloud. People can use the devices they love for work while protecting corporate data and adhering to security policies.

### DATA PROTECTION

Microsoft Azure Rights Management: Azure AD Premium and Azure Rights Management can help protect your corporate assets.

## How It Works

First, we meet with your team to discuss your business needs and objectives, helping us get a better idea of your situation. We will assign an expert to your project who will be your primary point of contact. Second, we analyse your current infrastructure and plan for your project, making sure you have all the prerequisites. We then enable all three components with your test lab. Finally, our Itery expert consultant demonstrates the capabilities of each component of EMS and makes the appropriate knowledge transfer so you are soon ready to start testing. The entire process takes no more than 10 days when we proactively manage the project to ensure everything goes smoothly.

## Key Benefits

- Unify your IT environment with a common identity across on-premises and the cloud, as well as deeply integrated capabilities for mobile device management (MDM)
- Enable your people to be productive across the broad array of devices they love with access to the applications they need
- Protect your data with a comprehensive set of access control and data protection capabilities
- Easy to acquire and cost effective
- A complete team of experts for your EMS needs
- Quick and fast deployment with transfer knowledge
