Why Every CIO Should Transform And Secure Active Directory In 2019

Are The Front Doors To Your Business Left Open?

Itergy

Is Your Business Safe?

The importance of making Active Directory work

Active Directory (AD) is the foundation of your Windows technology infrastructure – the Microsoft passport that identifies, names, classifies, segments, permits, restricts and denies your employees' access to the people and information they need to do their jobs, every minute of every hour of every day.

It's imperative that it function with craftsman-like precision and rock-solid security.

Think about how a slight mishap like an incorrect access or a greater crisis like a security breach or a faulty domain controller can wreak havoc with your AD implementation. Think about the daily routine and the myriad of changes your company goes through in the course of a year, all of which puts a strain on your Active Directory.

An improperly maintained AD can lead to costly operational disruptions, reduced productivity, security breaches, risk of noncompliance and major operational inefficiencies due to a lack of IT automation and to duplication of effort.

▶ It's time to check, modernize the doors that protect your corporate data and information.

SECURITY BREACHES DON'T COME CHEAP

$6.42M

2018

The Global Cost of **a Data Breach** Is Up in 2018. In this year's study, the average cost of a data breach per compromised record was $148, and it took organizations 196 days, on average, to detect a breach.

Corporate Data
SECURED

Compromising your organizations Active Directory is an easy way to gain access to all critical corporate data and resources. And funny enough, AD is often an area that is overlooked and underfunded.

As an IT business leader, some of your primary responsibilities are to keep the company's operations up and running, ensure that security is taken care of, and ensure that the organization is meeting compliance laws.

Accelerate

Your Cloud Adoption

The Cloud is the newest driver to optimize and modernize Active Directory, however in many enterprises, A.D. simply isn't Cloud-ready.

Running legacy (AD) has become one of the MAIN obstacles in leveraging cloud-based technologies to improve business and operational efficiency. Any missteps can have disastrous consequences. Investing in your AD infrastructure is now not simply a good idea,
—— it's a **necessity**.

CLOUD READY

Is your Active Directory Cloud Ready? Click here to find out.

Make Active Directory the agile, secure, mature business application it was intended to be—the one your enterprise needs in order to succeed in the coming era of business and Cloud computing.
Managed Services

What Does Itergy's Best In Class Managed Services Look Like?

Itergy

A guaranteed level of AD performance and monitoring backed by stringent SLA

Guaranteed availability with 24/7 monitoring and resolution

Enhancing visibility and accountability with in-depth Active Directory expertise

Monitors and manages Active Directory in over 65 countries

Itergy

Simplifying IT So You Can Focus On Your Business
